

Building lorry wheels - 2

13. Forming part 3 is easy with the use of a suitable dome-shaped object such as the end of a tool handle.

19. The wheel is now complete.

14. Cut out part 4 and glue it to the narrow end of the cone made from part 3.

15. Glue the combined parts 2 & 5 to the tyre which was completed at stage 9.

16. Glue the combined parts 3 & 4 to the inside of part 5 like this.

17. Part 3/4 should protrude beyond the wheel face 2.

18. Glue the back wheel face 6 onto the other side of the wheel.
