

Building lorry wheels - 4

13. Forming the shape of part 3 is easy with the aid of a suitably domed object like a tool handle end.

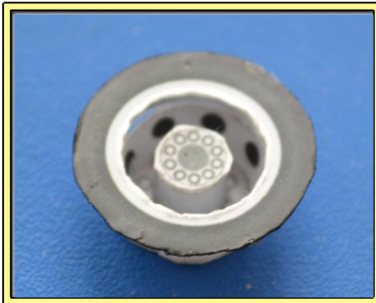

14. Make part 7 into a cylinder, printed side outwards. Cut out part 8 and glue that to one end.

15. Glue the completed 7/8 assembly to the centre of part 4.

16. Glue the narrow end of the part 3 cone to part 4. Make sure everything is concentric.

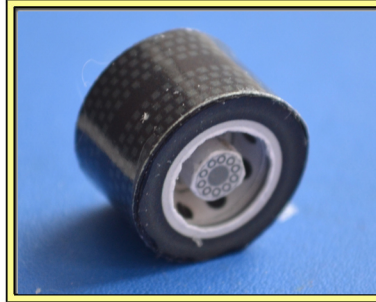

17. Glue part 2/5 to the other edge of part 3 as shown here. Make sure everything is concentric.

18. Glue the completed assembly into the tyre that was made at stage 9

19. Glue face 6 to the other side.

20. The wheel is complete.
